

Read & Play!

Expand on your reading and explore the creative process! Combine reading, writing, and dramatic play to build creative writing and presentation skills while having fun with your favourite stories.

Choose a book to read – it can be an old favourite or something new! Try our [eCollection page](#) if you need a new book!

Read the book, making note of character and setting details!

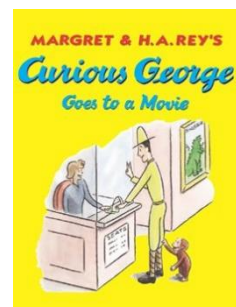

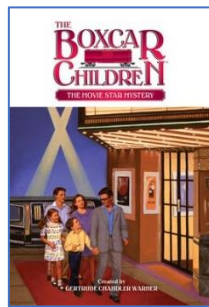

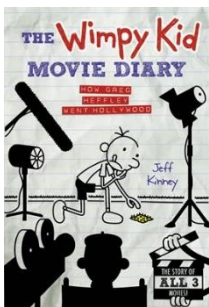

Write your own! Continue the story – if it's a picture book you can write another story with the same characters, for a chapter book try writing another chapter that might come at the end.

Explore the characters: choose a character from your book and list ways you are similar to and different from that character.

Act it out! Try acting out the story or chapter that you wrote – with family members or your favourite stuffed animals! Do you need to make changes to your story to make it easier to act out?
